

Mr. Smallwood is testing Star 10 Inc's 'Blue Stuff' on the inside of a barge.

Star 10 Inc's 'Blue Stuff' will remove rubberized epoxy paint / coating from swimming pools also.

Rubber Lining Removal

OHIO RIVER PADUCAH, KY

Star 10 Inc's
'Blue Stuff' Paint Remover
is tough enough to strip the
lining from this barge.

Removing rubber lining from a barge interior

Above is the staging area where they are preparing to use the 'Blue Stuff' to remove Columbia #7 from the interior of a barge.

It should be applied at 1/16th inch thick with a airless sprayer. We estimate coverage at 50 square feet per gallon. After the product is allowed to dwell overnight in the sealed barge. Box cutters are then used to cut the lining so it can be pulled off the walls of the barge.

Bernie Smallwood from Coating Systems & Supply is checking to see if Star 10's 'Blue Stuff' has properly softened the rubber lining in a barge.

Star 10 Inc has developed a new paint stripper we call 'Blue Stuff'. 'Blue Stuff' will soften rubber linings, swimming pool finishes and an epoxy from Carboline called Reactamine 760.

Our 'Blue Stuff' has a Methylene Chloride base and you should use caution when working with it. **A complete respiratory protection system is required when using this product.**
